

Great Barrier Reef

1. If you visited the Great Barrier Reef, what would you expect to see? You can draw and/or write your answer.

2. This is a photograph of coral spawning. Tick all the true statements below.

- It happens once a year
- A coral "baby" is called a polyp.
- A coral "baby" is called a planula.
- It happens after a full moon
- It happens in cold water
- There are no "mum" and "dad" corals
- It happens at night.

3. Write a Public Service Announcement for tourists to the Great Barrier Reef. How can they be **responsible reef visitors**? Include as many tips as you remember from the podcast, and add your own!

4. Plants and animals have a lot in common, and some important differences. Sort the following into their correct categories:

grow

make their own food
through photosynthesis

need to find food

have cells with DNA

will eventually die

can move around

are alive

stay mostly in one spot

PLANTS ONLY

ANIMALS ONLY

PLANTS & ANIMALS
